

A Handful Of Lightning

A Handful Of Lightning

Lightning Labs taking blockchains to the next layer. We are developing Lightning: an open protocol layer that leverages the power of blockchains and smart contracts to make cheap, fast, private transactions available to anyone around the world. User growth and application innovation in the blockchain ecosystem are driving the need for new protocol layers that build on the security and ubiquity ...

"Giant" VDG Lightning If you have access to a second large VDG sphere, you can create immensely long, dim sparks. (Remember, spark length is only limited by the voltage if the radius of electrode curvature is much larger than the gap between electrodes, and small electrodes can create VERY long sparks.)
