## **Bioactive Natural Products Part J**

A natural product is a chemical compound or substance produced by a living organism—that is, found in nature. In the broadest sense, natural products include any substance produced by life. Natural products can also be prepared by chemical synthesis (both semisynthesis and total synthesis) and have played a central role in the development of the field of organic chemistry by providing ...

1. Introduction. Gelatin is a soluble protein compound obtained by partial hydrolysis of collagen, the main fibrous protein constituent in bones, cartilages and skins; therefore, the source, age of the animal, and type of collagen, are all intrinsic factors influencing the properties of the gelatins (Johnston-Banks, 1990). Although to date, up to 27 different types of collagen have been ...

Natural skin care uses topical creams and lotions made of ingredients available in nature. Much of the recent literature reviews plant-derived ingredients, which may include herbs, roots, flowers and essential oils, but natural substances in skin care products include animal-derived products such as beeswax, and minerals. These substances may be combined with various carrier agents ...

Loquat, also known as Eriobotrya japonica, is a subtropical tree with a long history of use in traditional and herbal medicine. Although the loquat produces edible fruit that is rich in calcium, iron, vitamin A, and potassium, the therapeutic power of loquat is contained in its large and glossy evergreen leaves.
