

Chemoarchitectonic Atlas Of The Mouse Brain

Chemoarchitectonic Atlas Of The Mouse

Neurogenesis is the process by which nervous system cells, known as neurons, are produced by neural stem cells (NSC)s, and it occurs in all species of animals except the porifera (sponges) and placozoans. Types of NSCs include neuroepithelial cells (NECs), radial glial cells (RGCs), basal progenitors (BPs), intermediate neuronal precursors (INP)s, subventricular zone astrocytes, and ...
