Introduction. The Color Gamut defines the range of colors that a display can produce – so it is the most important defining visual characteristic of any display. While Color Gamuts have changed over the years, in the past virtually all displays needed just a single Gamut to produce all of the content that a user wanted to see.

Periwinkle is a color in the blue and violet family. Its name is derived from the lesser periwinkle or myrtle herb (Vinca minor) which bears flowers of the same color. The color periwinkle is also called lavender blue. The color periwinkle may be considered a pale tint of blue or a "pastel blue".. The first recorded use of periwinkle as a color name in English was in 1922.
