Application Report SLVA642-June 2014 Hardware Design Considerations for an Electric Bicycle Using a BLDC Motor SrivatsaRaghunath ABSTRACT A traditional bicycle is a two-wheel vehicle that is propelled by the rider who delivers muscle power

Hardware Design Considerations for an Electric Bicycle ...

Australia. In Australia the e-bike is defined by the Australian Vehicle Standards as a bicycle that has an auxiliary motor with a maximum power output not exceeding 200 W without consideration for speed limits or pedal sensors. Each state is responsible for deciding how to treat such a vehicle and currently all states agree that such a vehicle does not require licensing or registration.

by Stephanie Patterson Copenhagenize Design Company's time at our very cool co-working space on Paper Island/Papirøen is sadly coming to an end - the island's old industrial buildings are being demolished to make way for a new residential development. We'll miss the creative vibe in our office - and on the island - that we have experienced daily for over four years.
