Introduction To Computers Lessons

This lively site features 'hands on' with MicroWorld's Project Builder Logo Language for teaching programming to children. MicroWorlds is also available for purchase. A Java Powered Logo allows you to try it out! The site includes computer lessons and WWW Bulletin Board for all to use!

Computer Lessons for Kids and Small Adults

The Digital World. To understand the digital world, the best place to begin is the device you are using right now—the computer. In this section, you will learn a bit about the history of computers, the four essential components of a computer, and the differences between your brain and a computer.

The Journey Inside: Introduction to Computers

This is a course in Java programming for beginners. It covers the fundamentals of programming, roughly the same material that is covered in a beginning programming course in a university or in a high school AP Computer Science course.

Introduction to Computer Science using Java

Turn yourself into a typing hero! Welcome to this new & improved, and still humble typing web course. Here you'll find an expanded set of free online typing lessons and typing exercises for beginning typists, and frustrated hunt-and-peckers who want to move from four-finger typing to full-blown touch typing.

Peter's Online Typing Course - Learn Keyboarding Online!

This introduction to Alice is a perfect format for Alice events or workshops and is great for use as an Hour of Code event. This lesson follows the animation production process from storyboarding to programming with Alice and The Sims.

Computer Economics--IT metrics and best practices for the strategic and financial management of information technology, with focus on IT spending benchmarks by industry and organization size, IT staffing ratios, IT best practices, outsourcing, and technol

Computer Economics -- for IT metrics, ratios, benchmarks ...

This course will be written almost exclusively in assembly code. Assembly code is code that is very close to what the computer understands. How a computer really works is that there is a small device called a processor which is capable of performing simple jobs like adding numbers, and there is a set of one or more microchips called the RAM which are capable of storing numbers.

Computer Laboratory - Raspberry Pi: Lesson 0 Introduction

- The primary hardware technology that we use on networks today is a standard called ethernet. And ethernet is absolutely fantastic for getting frames from one computer to the next, but it doesn't make a network. It doesn't provide resources, and that's what we need to talk about next. We need to talk about the network capabilities of your system to be able to do things like share resources ...
