Microstructures and metamorphic reaction processes The application of thermodynamic methods has revolutionised many areas of metamorphic petrology, such as the determination of pressures and temperatures of equilibration, and yet our understanding of the kinetics of metamorphic processes has lagged behind.

Metamorphic Processes (0045520208) by R. H. Vernon

Metamorphic Textures provides definitions, descriptions and illustrations of metamorphic textures, as well as the fundamental processes involved in textural development. This book is composed of 11 chapters and begins with a presentation of the metamorphic processes and the production of metamorphic minerals.

Metamorphic Textures Book - PDF Download

A metamorphic reaction is a chemical reaction that produces, or changes, an assemblage of metamorphic mineral and fluid phases in a rock. The changes affect the compositions of the phases and may also include changes in the phases that are present. Metamorphic processes are those processes that drive metamorphic reactions, by causing a change in the chemical conditions of the rock, such as the ...
