The Laboratory Rabbit Guinea Pig

The guinea pig or domestic guinea pig (*Cavia porcellus*), also known as cavy or domestic cavy, is a species of rodent belonging to the family Caviidae and the genus *Cavia*. Despite their common name, guinea pigs are not native to Guinea, nor are they biologically related to pigs, and the origin of the name is still unclear. They originated in the Andes of South America, and studies based on ...

Eye Discharge. Normal Guinea pigs excrete a milky white liquid which lubricates their eyes and is used to help them clean their faces. After the eye fills up with the white fluid, the guinea pig will then take their front paws and make washing motions. This may happen several times per day although you may never even notice.
